Covington Twp, PA 18444
570-842-8336

April 30, 2020

Dear Sir:

As of April 30, 2020, I am charged with responsibilities to address the dangers facing Covington Township. I take this responsibility very seriously as well as the health and well being of our community.

Covington Township Authorities filed a declaration of Disaster Emergency due to the COVID-19 virus. We take great pride in our community and concern for the health and welfare of our residents. We feel it is in the best interest of our community and its residents that the Eagle Lake community remains closed.

→ Due to the transient nature of the campground and the health concerns of our residents, Covington Township is ordering the shut down of Eagle Lake until May 15, 2020. At that time, we will re-evaluate the re-opening of Eagle Lake. The re-opening will be dependent upon the number cases of the virus at that time as well as safety actions plans that will be put in place. All amenities of Eagle Lake will also remain closed until further notice.

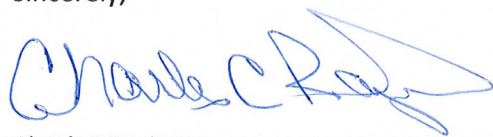

Eagle Lake is required to submit a safety plan of action to the EMA coordinator as to how you are going to ensure the safety of Eagle Lake employees and visitors and our community. This plan must be submitted by May 7, 2020 to ensure the coordinator has time to review its plan.

Lackawanna and Covington Township are still considered in the PA Red zone, meaning cases of COVID-19 has not begun to subside therefore only essential travel is permitted in our area.

We are all anxious for everything to open and be up and running as normal, but we all know that is no longer the situation we are in. We truly do not know when everything will re-open completely. We are completely focused on keeping our large community safe and healthy. We all need to do our part to help stop the spread of the COVID-19 virus.

We look forward to working with you and getting the community up and running.

Sincerely,

Charles Raziano
Covington Township
EMA Coordinator
